

Errata for

Guénette, S., and Morato, T., 2001. The Azores Archipelago, 1997. In: Fisheries impacts on North Atlantic Ecosystems: Models and analyses. pp. 241-270, Ed. by S. Guénette, V. Christensen, and D. Pauly, Fisheries Centre, University of British Columbia, Vancouver, BC, Canada, Vol. 9 (4) 344 pp.

the section Phytoplankton, group1, p. 242 of The paragraph should read:

The biomass of phytoplankton is based on the samples taken at the Azores front (south of Azores), in early October, (Li, 1994). The author measured Chlorophyll *a* in the first 200 m, which sums up to 22.4 **mg** Chl \cong m⁻². Using a ratio of **1 g** Chl *a* for **32 g** of carbon for the Eastern Atlantic Water (Fasham *et al.*, 1985) and a ratio of 10 g wet weight for each gram of carbon (Pauly and Christensen, 1995), we obtained a biomass of **7.16 g** \cong m⁻². Fasham *et al.* (1985) obtained **3.52 g** \cong m⁻² WW in April-May in the same area for a fraction water column (from 5 m to the maximum Chl *a* concentration).
